■ Problem

- **Coordinating group travel plans** is difficult.
- **Traveling solo** can be lonely, unenjoyable or even dangerous.
- **Experiencing local culture** can be difficult without a guide or someone who speaks the local language.

No solution so far solves all of these related problems at once & well.

The background of the slide features a high-angle aerial photograph of a lush green landscape, likely a tea plantation. The fields are organized in a grid pattern, separated by numerous winding, brownish-grey dirt paths that crisscross the terrain.

■ Our Solution

WeWander is an app that helps you
find compatible travel partners

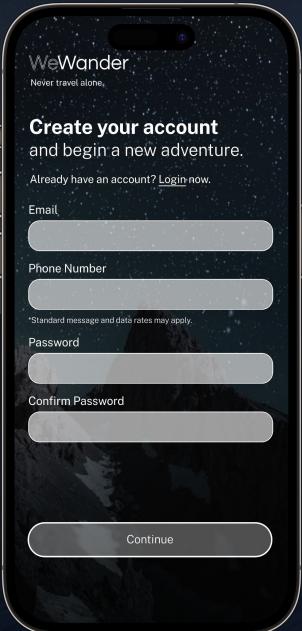

through a **matchmaking algorithm** that takes into account your
travel plans, preferences, interests and spoken languages.

We envision this app to be for **young adults, new travelers, and**
passionate locals.

WeWander

■ Concept and Task Workflow

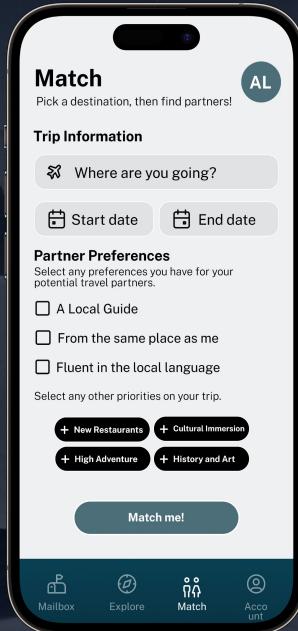

1. Account Creation

2. Profile/Bio

3. Questionnaire

4. Match!

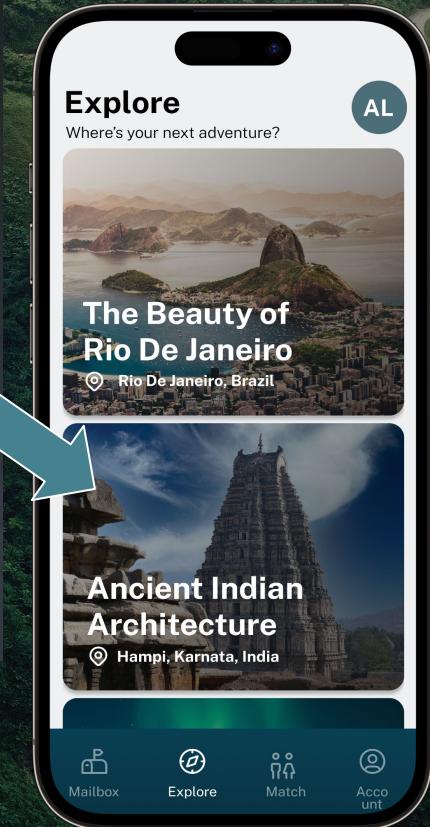

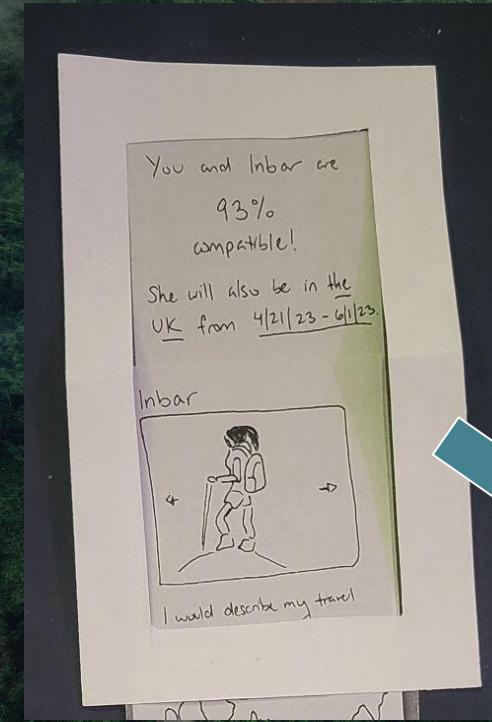

WeWander

Evaluation

Most significant UI update:
Addition of menu

Selected “tabber” menu design for:

- One-handed design
- Easy to navigate
- No need for many menu items

WeWander

Pitch

WeWander, the app designed to help solo travelers find like-minded companions for their next adventure!

Create an account, build a profile, and fill out a questionnaire about you and your travel plans.

Find compatible travel companions.

Explore new destinations, experience local cultures and minimize safety concerns.

Next Steps: incorporating more safety features and introducing more flexible travel options

WeWander
